DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Esposto US Patent No. 5,743,325 in view of Yee US Patent No. 6,478,258.

Esposto discloses the applicant's invention as claimed with the exception of providing one or more heat pipes that cross couple opposite facing payload radiators. Yee discloses spacecraft multiple loop heat pipe thermal system for internal equipment panel applications that does provide one or more heat pipes that cross couple opposite facing payload radiators (see column 2 lines 25-30). Therefore it would be obvious to modify Esposto's invention by providing one or more heat pipes that cross couple opposite facing payload radiators in order to increase the cooling process.

Claims 3, 4, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Esposto US Patent No. 5,743,325 as applied to claims 1 and 2 above, and further in view of Caplin US Patent No. 5,806,800.

Esposto discloses the applicant's invention as claimed with the exception of providing a body and a plurality of solar arrays.

Caplin discloses a dual function deployable radiator cover that does provide a body 12 (see figure 1) and a plurality of solar arrays 18 (see figure 1). Therefore it would be obvious to

Art Unit: 3743

modify Esposto's invention by providing a body and a plurality of solar arrays in order for the invention to function properly.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
